PARTNER PROGRAM

KEY BENEFITS

- Our emphasis is on professional development through learning
- We are committed to finding the "Right Solution"
- Great pool of experienced professionals
- Development through innovation

WHS/AD – WASHINGTON HEADQUARTERS SERVICES / ACQUISITION DIRECTORATE

Ongoing Work

Supplies or Services Work on White House activities related to Commercial and Institutional Building Construction, Material Supply, and Facilities Support Services in 2024.

WHITE HOUSE COMMUNICATIONS AGENCY

The White House

AgileITech supported the White House Communications Agency in developing and executing a compliant IGCE and full procurement of mission-critical communications equipment. The team conducted market research, validated pricing, managed sourcing and delivery in alignment with WHCA and DITCO standards, and provided administrative support throughout the process. Deliverables met IUID compliance, ensuring an auditable and fully fulfilled procurement package that enhanced operational readiness. Work on White House activities related to Commercial and Institutional Building Construction, Material Supply, and Facilities Support Services in 2024.

DISA/DITCO-SCOTT-PL83 DOD

Microsoft Dynamics CRM 2011

Agile1Tech was the Prime contractor for updating CRIMS user training content from CRM 2011 to Dynamics 365. The project included theme development, data migration, and extensive testing, supporting over 400 users globally. Agile1Tech's approach involved a thorough content assessment, data cleansing, and the application of SAFe principles for quality assurance. The team ensured seamless software migration, rigorous performance testing on AWS Cloud, and robust security enhancements, resulting in a secure and efficient training platform.

U.S. Department of Transportation (DOT)/Federal Motor Carrier Safety Administration (FMCSA)

URS Portal

Agile1Tech was a subcontractor for iWorks on the URS Portal project for the Department of Transportation (DOT). The project involved creating a classified platform to streamline the Unified Registration System (URS) and enhance the registration process for FMCSA. Agile1Tech developed key features including a Communications Dashboard for centralized communication, an Automated Pre-Screening Feature to improve registration accuracy, and advanced Messaging and Event Management for secure communication and compliance management. Additionally, robust administrative functions were implemented for better control, and comprehensive analytics were integrated to provide real-time data insights. The URS Portal significantly improved FMCSA's ability to maintain accurate regulatory information, contributing to a more efficient and secure transportation industry.

USAID

Development Information Solution (DIS)

Agile1Tech was a subcontractor for USAID on the development and enhancement of DIS, a web-based portfolio management system for USAID. The project involved creating a Java-based search engine, extensive testing (including performance, 508 compliances, and mobile testing), and implementing an automated testing framework. Key achievements included successful AWS cloud integration, streamlined data tracking and reporting, and improved system functionality, all within an Agile Scrum framework.

US Department of the Treasury (USDT)

FinCEN (Treasury)

Agile1Tech, as a subcontractor, provided comprehensive IT Systems Management and technical services for FinCEN, including web application development, data-driven testing, and performance monitoring. The project involved implementing a robust DevOps strategy, automating testing processes, and ensuring compliance with 508 and mobile testing requirements. Agile1Tech supported FinCEN's mission by enhancing data management, cybersecurity, and system operations through advanced analytics and risk management practices.

OURCARE

OPTDATA – CLASSIFIED SITE DEVELOPMENT

Agile1Tech Corporation served as the prime contractor for the OPTDATA project with Ourcare from February 2018 to present. The project involved developing and maintaining both a web-based application and an Android mobile app for managing client medical information. Utilizing Agile Scrum methodologies, the team delivered a solution with features including nurse interaction capabilities, two-factor authentication, and cloud storage on Microsoft Azure. The project also encompassed extensive testing across platforms, including performance, security, and usability, supported by a robust team of developers, testers, and project managers.
